## Raborn Praised As CIA's Boss

To The Editor:

In Sunday's "Parade" section of your paper, Walter Scott's "Personality Parade" purports to give out facts. It is only fair to point out that his "facts" are incomplete.

In addition to his comments on Admiral Raborn, CIA head, he should have gone on to mention the smear campaign being directed against Admiral Raborn to force him out of office, master-minded by the KGB, the Soviet Secret Police.

Director Raborn is doing a superior job, he works closely and harmoniously with J. Edgar Hoover, and he meets the thorough approval of President Johnson. Hoover is first on the KGB list to be discredited and Raborn is second. This is from a Scott-Allen Report.

Further, Walter Scott says that "the present government in Viet Nam does not want peace because ensuing free elections would depose them from their positions of power." One wonders if Walter Scott frames his own questions and in this case he neglected to mention that the Viet Cong's control of South Vietnamese villages was gained by threat and terror, torture and murder. — MRS.
